- Painters Partition
- -> Aggressive Cows.
  - -> Ath Magical Number (if tim permits)

## Painter's Partition Problem

Civen N boards with length of each board.

- a) A painter takes T unit of time to paint 1 unit of length.
- b) A board can only be painted by I painter.
- e) A painter can only paint boards placed next to each other (i.e continuous segment)
- If find min no. of painters required to paint all boards in X unit of time. Return -1 if not possible.

Niss. 
$$\begin{cases} T=2 \\ X=15 \end{cases}$$
 One=-1, Gor (ast board, time taken = 9.2= 18 min

$$\begin{bmatrix} T = 2 \\ X = 30 \end{bmatrix}$$

Painter's Partition Problem - I

[aboyle]

Civen N boards with length of each board.

- a) A painter takes T unit of time to paint I unit of length.
- b) A board can only be painted by I painter.
- e) A painter can only paint boards placed next to each other (i.e continuous segment)
- Ques find minimum time to paint all boards it P painters are available.
